Testimonial letter
for CostBusters Hungary Kft.

2nd December, 2013.

To Whom It May Concern:

We keep controlling our cost very strictly; however we must admit that our capacities are limited. For the sake of efficiency we must set up a priority list, and the smaller overhead costs are at the end of this list. We always intended to review all the small costs, but there was never enough time for them.

The offer from CostBusters came in handy. Based on their references they seemed to be capable to do the job, so we decided to sign the agreement. Naturally I had some concerns. We employed advisors earlier at special areas such as energy and telecommunications. Based on those experiences I was afraid that we also have to invest some work into this project, and I was concerned whether there will be enough return on this investment.

Unlike other advisors we employed earlier CostBusters review not only one special cost (where they either find saving or not), but they do a very comprehensive overhead cost analysis. Therefore they delivered the result we expected. Although most of our costs have been found to be at the minimum level, but in the stationary, in the landline, and especially in the lubricants costs significant savings have been identified and implemented.

CostBusters have really dug down deep in details. They made an accurate analysis and effective cost reduction project. I recommend them to everyone who wants to save cost while keeping focused on the highest priority tasks.
