

Testimonial letter
for CostBusters Hungary Kft.

9st June, 2015.

To Whom It May Concern:

Naturally we try keeping continuous control over our overhead costs. We have signed an agreement with CostBusters Hungary Kft. because we had to admit that our staff's time and capacity is limited. Furthermore the overhead covers a very wide range of areas, and at some kind of costs we do not have the necessary expertise. We are specialists in heavy trucks and lorries, and that's how it should be.

I was almost certain that the project will result savings if they revise our overhead with sufficient accuracy. The result became roughly 16,000€ savings per annum. On one hand this is a bit below my expectations, on the other hand this is a good news, since now we know that we hadn't had too high expenses before.

I had had some concerns about how CostBusters will calculate the savings, and how they would charge us with the success fees. I've just received the first quarterly revision report, and now I see that the concerns were unnecessary, because the calculations are precise and easy to overview.

All in all CostBusters have proved to be a good choice. They completed the task that we may have been able to do only months later or never. They have saved us money and – what is even more important – time.
